Fire stopping inspection

Project / contract

Record ID / revision

Site / building / level / grid

Contractor / work package

Inspection date / stage

Inspector / organisation

01 / PREPARE AND INSPECT

Before use: enter project acceptance criteria and document revisions on page 2. Mark P = pass, F = fail, NA = not applicable (give reason), or O = outstanding. Blank does not mean pass.

No.	Inspection / control prompt	P/F/NA/O	Evidence / action ref.
1	Identify each penetration or linear joint with a unique location and system reference.		
2	Confirm required fire performance against the approved fire strategy and drawings.		
3	Check the tested or assessed system covers the actual substrate and service arrangement.		
4	Verify opening size, annular gap, service supports and separation against system evidence.		
5	Check product identity, batches, shelf life and installer competence records.		
6	Check backing material, seal depth, orientation and installation on required faces.		
7	Verify collars, wraps, fixings and distances against the approved system detail.		
8	Check movement provision, interfaces and compatibility; escalate unassessed variations.		
9	Photograph the installation before concealment and record its identification label.		
10	Obtain required inspection acceptance and retain system evidence and location register.		

If a requirement is not met or cannot be verified, record the issue and apply the project escalation process. Do not release a hold point without authorised acceptance.

Generic template. Adapt to the project, approved design, specification, manufacturer instructions and current applicable UK standards. Select the correct jurisdiction: England, Wales, Scotland or Northern Ireland. This form is not a compliance certificate, design approval or substitute for competent inspection.
